Summary

Final-year CSE (AI & ML) student (Class of 2027) who builds, tests and **evaluates** agentic AI systems, including a live, solo-built multi-agent platform with 280+ tests and an evaluation harness. Full-stack internship (Java, Spring Boot, React). Seeking full-time **AI/ML Engineer** or **Software Engineer** roles.

Education

VIT-AP University, B.Tech in Computer Science Engineering (AI & ML) 2023 – 2027

- **CGPA:** 8.55/10 | **Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Machine Learning

Dr. KKR's Happy Valley School, Class XII: 88% | **KKR Gowtham School**, Class X: 100% 2021 – 2023

Experience

Full Stack Web Developer Intern, GRAAS (Growth as a Service) June 2025 – July 2025

- Developed 2 full-stack web applications end-to-end using **Java, Spring Boot and React**, serving both internal and client-facing use cases
- Designed and implemented **10+ RESTful API endpoints** and integrated them with responsive React interfaces
- Debugged and resolved backend and frontend defects, reducing reported issues during QA cycles

Projects

Pathlight – Autonomous Career Intelligence Platform (Solo) Live | GitHub

- Built and deployed (Vercel, Render, MongoDB Atlas) an agentic platform that sources openings from job boards and placement emails, checks eligibility, finds skill gaps, tailors resumes, and applies **only after the user approves**
- Orchestrated **5 LangGraph agents** with **deterministic rules before any LLM call**, a bring-your-own-key LLM fallback chain (Gemini, Groq, OpenAI, Anthropic) and **4 MCP servers** (Gmail, GitHub, filesystem, reminders)
- Wrote an **evaluation harness** on hand-labeled benchmarks: discovery agent 100% field accuracy and 0.94 skills F1; eligibility agent 87.5% accuracy with **0 false positives**; used it to retune retrieval thresholds
- **287 automated tests** (222 pytest, 65 Vitest) with fake-LLM dependency injection; a code-level guard rejects any tailored resume that invents skills
- *Tech: Python, FastAPI, LangGraph, MCP, Gemini API, ChromaDB (RAG), MongoDB, Next.js, TypeScript, Docker*

Krishi-Agent – Telugu Voice Farm Advisory (Team Capstone) GitHub

- Voice assistant answering farmers' spoken Telugu questions by combining a fine-tuned DINOv2 crop-disease classifier, weather and mandi-price agents and a rule-based conflict resolver (FastAPI, PyTorch, Ollama)
- **My work:** Telugu-first UI redesign with an English switch and phone/desktop layouts; fixed 4 wrong-answer bugs in the Weather Agent with regression tests

Scanline – Agentic Document Summarizer Live | GitHub

- Browser-only agent (React, pdf.js, Tesseract.js) that extracts text from PDFs with OCR fallback and shows each step live; strict-schema structured output, with Gemini first and Groq (Llama) as automatic fallback

Quotation Management Web App (Real Client) GitHub

- Digitized product and quotation management for a family-owned home-theatre business with **Spring Boot, React and MongoDB**, replacing a manual Excel process with automated PDF quotations; deployed on Azure

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, SQL

AI / LLM: LangGraph, Multi-Agent Systems, Model Context Protocol (MCP), RAG (ChromaDB), Tool Calling, LLM Evaluation, Prompt Engineering, Gemini API, Hugging Face

Backend & Frontend: FastAPI, Spring Boot, REST APIs, JWT Auth, React, Next.js

Data, Cloud & DevOps: MongoDB, SQL, Docker, Azure, AWS, Vercel, Render, GitHub Actions

Testing & Fundamentals: pytest, Vitest, DSA, OOP, DBMS, Operating Systems, System Design

Certifications: AWS Certified Cloud Practitioner, Scrimba Learn React
