Summary

Computer Science Engineering (AI & ML) undergraduate with hands-on full-stack development experience (Spring Boot, React, MongoDB) and applied experience building agentic AI systems (LangGraph, MCP, LLM-powered pipelines). Skilled in RESTful APIs, cloud deployment on Azure, and Git/GitHub. AWS Certified Cloud Practitioner seeking Software Engineer / Full Stack Developer / AI Engineer roles.

Education

VIT-AP University, B.Tech in Computer Science Engineering (AI & ML) 2023 – 2027
- Current CGPA: 8.55/10 | Relevant Coursework: DSA, DBMS, OS, OOP

Dr. KKR's Happy Valley School 2021 – 2023
- Grade 11 & 12: 88%

KKR Gowtham School, Nellore 2021
- Secondary Education (Class 10): 100%

Experience

Full Stack Web Developer Intern, GRAAS (Growth as a Service) June 2025 – July 2025
- Developed 2 full-stack web applications end-to-end using Spring Boot and React, serving both internal and client-facing use cases
- Designed and implemented 10+ RESTful API endpoints and integrated them with responsive React interfaces
- Improved application reliability by identifying and resolving backend and frontend bugs, reducing reported issues during QA cycles

Technical Skills

Languages: Java, Python, SQL, HTML, CSS, JavaScript
Frameworks & Libraries: Spring Boot, React, FastAPI, LangGraph, REST APIs
AI/ML & Agentic Systems: LLM Orchestration (Gemini API), LangGraph Multi-Agent Pipelines, Model Context Protocol (MCP), Prompt Engineering
Tools & Platforms: Git, GitHub, MongoDB, Docker, Postman, Azure, IntelliJ IDEA, VS Code
Core Competencies: Data Structures & Algorithms, Cloud Computing (AWS), Full-Stack Development, System Design, Problem Solving, Teamwork

Projects

Pathlight – Autonomous Career Intelligence Platform
- Architected an event-driven, agentic career-intelligence platform that ingests job postings/resumes and autonomously extracts, evaluates, and tracks opportunities end-to-end
- Built a multi-agent LangGraph pipeline (Discovery & Eligibility agents, Gemini API) with rule-checks before invoking the LLM, plus an MCP server for sandboxed agent tool access to documents
- Implemented the backend on FastAPI/MongoDB (Beanie) with JWT auth, DB-enforced deduplication, and a 37-test suite using fake-LLM dependency injection
- **[Code:** GitHub Repo**]** *Tech: FastAPI, LangGraph, Gemini API, MongoDB, MCP, Docker, JWT*

Quotation Management Web App
- Built a full-stack web application (Spring Boot, React, MongoDB) to digitize product and quotation management for a family-owned home theatre business, replacing a manual Excel-based process with a PDF quotation generator
- Implemented product catalog management and dynamic price customization; optimized responsive UI for desktop and mobile, deployed on Azure
- **[Code:** GitHub Repo**]** *Tech: Spring Boot, React, MongoDB, Azure*

HuggingFace Chef
- Built a React-based AI recipe generator using Hugging Face's inference API to suggest creative recipes in real time from user-input ingredients
- **[Code:** GitHub Repo**]** *Tech: React, Hugging Face, Azure*

Certifications

- AWS Certified Cloud Practitioner **[**View Badge**]**
- Scrimba Learn React Certification **[**View Certificate**]**
